PROJECTS

The Musical Time Machine

The Musical Time Machine is a web application that allows users to discover music and information specificities by specific chosen date. Our group built this site using HTML, CSS, JavaScript, and third-party API's..

Password Generator

This web application was built using HTML, CSS, and JavaScript. The password generator computes a secure password based on the answers a user gives to certain prompts.

Weather Dashboard

This project was built using HTML, CSS, Bootstrap, JavaScript, and the Open Weather API. A user can search for weather in different cities for the current weather and for the 5 day forecast.
